Helps your dog thrive from puppyhood to faithful elderly friend.

## MICRONUTRIENTS... ESSENTIAL TO THRIVE!

The finest food ingredients are increasingly micronutrient deficient due to the expanding depletion of our agricultural soils and processing of ingredients. These deficiencies can affect virtually all metabolic functions.

The oceans are nature's richest storehouse of micronutrients. We carefully concentrate a unique broad spectrum of these naturally occurring treasures from certain ocean plants. Our innovative selection and processing techniques combined with other important natural ingredients of highest quality, ensure maximum levels of micronutrient activity.
